Note to File G2-28118
Lewis County Community Services Department
Jill Walsh

Received the PA form for the well at the County's Toledo park. I spoke with Dave Schilperroote, and apparently, they are using the well for domestic supply only, and have been using the pond for irrigation.

I recommend that we issue a certificate under G2-28118 for multiple domestic supply only.

The County filed surface water S2-28950 for irrigation.

Informed Lewis Co. Comm. Services that we would hold this PA until we determine if we can issue a permit for S2-28950 for irrigation — if we can not, they will need to change the operation of this system to include irrigation as permitted.

Dear Sir or Madame:

Re: Surface Water Application No. S 2-28950

We acknowledge receipt of your affidavit of publication of notice in connection with the above-numbered application.

The water codes require that no action be taken toward issuance of a permit earlier than thirty (30) days after the last date of publication. This period of time is allowed for filing any protests or objections. In some cases it is also necessary for us to await approval of the Departments of Fisheries and Wildlife before issuing permits.

A site investigation will be made by this office before we issue a permit decision. In light of our water right backlog, we estimate it will be about 18 months after receipt of your application before we are able to conduct the site investigation.

Sincerely,

A handwritten signature in cursive script that reads "Sheri Fox".

STATE OF WASHINGTON, DEPARTMENT OF ECOLOGY NOTICE OF APPLICATION TO APPROPRIATE PUBLIC WATERS

TAKE NOTICE: That Lewis County Community Services Dept. of Chehalis, Washington on September 23, 1993 under Application No. S2-28950 filed for permit to appropriate public waters, subject to existing rights from South Lewis County Pond in the amount of 0.13 cubic feet per second as needed year round each year, for irrigation during the irrigation season. The source of the proposed appropriation is located within SW 1/4 SW 1/4 of Section 17, Township 11N., Range 1 W. W.M., in Lewis County. Protests or objections to approval of this application must include a detailed statement of the basis for objections: protests must be accompanied by a two dollar (\$2.00) recording fee (check or money order only, cash will not be excepted) and filed with the Department of Ecology, at the address shown below, within thirty (30) days from December 29, 1993. Dept. of Ecology, Water Resources, P.O. Box 47775, Olympia WA 98504-7775.

Dear Sir or Madame:

Re: Surface Water Application No. S 2-28950

Your application for the appropriation of water has been assigned the above referenced number. Please refer to this number in future correspondence.

Enclosed is a notice of your application which must be published once a week for two consecutive weeks in a qualified legal newspaper of general circulation in the County or Counties in which the storage, diversion, and use is to be made and in other newspapers as directed. A list of these newspapers in your county is enclosed.

The applicant is responsible for the payment of the publication. Please read the notice carefully to make sure it is correct. Should you find an error, please return the notice to our office for correction.

You should mail or deliver the enclosed notice to a newspaper regarding publication as soon as possible. When you receive the affidavit of publication form the newspaper, please forward it to this office promptly. Further processing of the application will not be made until the affidavit is returned.

A site investigation will be made by this office before we issue a permit decision. In light of our water right backlog, we estimate it will be about 18 months after receipt of your application before we are able to conduct the site investigation.

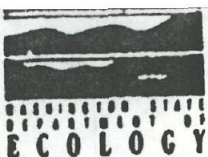

Sincerely,

Dear Sir:

Lewis County is in the process of developing a 43-acre park in South Central Lewis County. As part of the operations process of the park, we desire to pump water, from a 17 acre pond (see site plan), to irrigate approximately 8 acres of turf.

In July 1993, a contractor drilled a well, on the park site, that is producing approximately 25 gal. per minute. This capacity is far below what we need for an irrigation system. Thus, our desire to secure the necessary permits to withdraw water from the pond for the purpose of irrigation.

The attached site plan highlights the pond (in blue) and the area we desire to irrigate (in green). The pond has an average depth of 20' and a maximum depth of 30'. The pond is fed via subterranean flow from the adjacent Cowlitz River and numerous springs.

We would propose to irrigate only during the summer months and use a maximum of 400,000 gallons per week. A 5 HP, single phase pump would be utilized, with either an underground automated irrigation system or an above ground, wheel move type of irrigation system.

In 1992, we secured the necessary permits, from DOE, to withdraw water from the pond and discharge it into the adjacent Cowlitz River. This action was necessary to lower the level of the pond so construction could occur to develop a swim area (located in a portion of the pond). To accomplish the lowering of the pond, a 10,000 gallon per minute pump was utilized. This set-up effectively lowered the pond by 10'. However, the pond would go no lower due to the influx of water from the adjacent Cowlitz River and the numerous springs circling the pond. This aptly illustrated to us the dynamic flow of water into the pond from the adjacent river and numerous springs. Thus, we feel very confident that the pond will rapidly replenish itself of any water that we might remove.

Page Two

The proposal to irrigate the turf, from water within the pond, has been reviewed by the Lewis County Environmental Health Department and an irrigation system, for this purpose, is presently being designed.

I would welcome the opportunity to review this matter with you. Attached is the completed application. If additional information is required, please contact me immediately.

We would like to install this system in 1994—thus, your attention to this matter would be appreciated.

Sincerely,

Dave Schilperoort
Director
